PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building and deploying scalable web applications using Java, Spring Boot, React, PostgreSQL, HTML, CSS, and JavaScript. Developed production-style full stack platforms featuring JWT authentication, REST APIs, role-based authorization, and responsive UI design.

PROJECTS

LearnIQ - Full Stack Assessment Platform | *Java 17, Spring Boot, React, PostgreSQL, JWT, Spring Security* 2026

- Developed a production-style full stack assessment platform with separate ADMIN and STUDENT portals using React and Spring Boot.
- Implemented JWT-based authentication and role-based authorization using Spring Security for secure session isolation.
- Built RESTful APIs for assessments, analytics, question banks, and student performance tracking workflows.
- Integrated PostgreSQL database and deployed frontend/backend services on Render with production-ready configuration.
